

Regarding our new "Indiana Telephone Privacy Law" which appears to be under review by the FCC:

Prior to our no-call list in Indiana, we would receive calls all day long, mainly from long-distance telephone companies. It was not unusual for our dinner hour to be interrupted once or twice a night.

We would get calls from the same company 2-3 times a week.

Since I registered for the "no-call" list we finally can have some peace and quiet and I would hate to return to that situation again.

Please do not change what is really helping in Indiana.

quiet, especially at night, from unsolicited callers.
